NANO TECHNOLOGY

THE CONSTRUCTIVE ELEMENTS

Nano technology is the particles of the human evolution. Constructive elements are build of 7 Hz to 8 Hz mega and anti-mega particles. It is actually in reverse when you look into the microscope it looks the smallest particles of all the matter. But in fact in the structure of the universal quantum magma is the biggest and the strongest anti-matter. This energetic mega force is the building blocks of all the cosmic energetic field and is constructing the structure of the nano anti-matrix of reality. The realities of the coordination of all the rebuilding materials of the micro-and macrocosm.

If you wish to build the reactors with nano-particles you must start of the Frequency and Sound structures. The quantum computer algorithm is the one to show you how to combine this. So you can be able to build new and constructive anti-multiple structure of mega-force.

That is the Ether technology. You remember the force of your energetic force in your crystallize structure and the building blocks of the photons and the nano-particles gold of your energetic immune force.

2

Whit the combination of your chromosomes in the “0” point, will redirect the structure of your nano-particles so you can recall the matter and mold it in the now momentum.

This is how you all redirect prisms of complex structures in geometry patterns. And then any structure can become life energetic force matter in your hologram. For you to understand you need to have great knowledge in the matter, anti-matter, dark matter, gravitational matter and reconstructive matter.

Reconstructive matter is: the recall of all the crystallize algorithm.

Is in your chromosomes structure. Combine all in one '0' point.

Rebuilding is now.

That is how the nano-technological matter interacts in your bodies to recall, reconstruct, and rebuild any life etheric force that is coming in the '0' point in the now.

Great mind will realize this explaining.

C9 Council of 9

11/24/15

Apply nano-particles of Graphene. This will give enormous strength and would be able to move in layers parallel reality and each layer could be used for different agenda (applications). The way you do that is by comparing the particles of the particular layer (parallel) and that will be done also with Hz.

Give a specific Hz to the specific parallel layer and that is how you can build a technology of multi functions almost like the Human Body.

Systems of Argon (Ar) material is not doable- stay away from that. Ignition explosion with that.

But the Graphene can also have Silicon(Si) but will be heavy.

So stay with easy materials that are very thin and are very lite because the pressure will be carried without much resistance.

Carbon © is also very good to use. Combine one Carbon © with one nano-particle- squeeze(put pressure) with a Hz 0.3879 and lets play with it and you will see incredible changes. The particle of the layer can be also activated by light of different colors. Must experiment with that. Systems of 2 by 2 can be build too. Nano 1 pressure of space bigger more functions will give. The surface is a lot and the space in between of the layers are a lot.

You may have entire Universe in there.

C9 Council of 9

11/27/15

Fig. 1

Block by block , layer by layer.

Sovereign systems are: All the combine sections of the nanoparticles.

You rebuild them with signature Hz. Do not solve it immediately- look at the reaction first. The quantum computer algorithm will help you to point the missing link between the colors. Go by the colors. See how they combine.

The secret is in the transition. Look at what with what is combining in the transition and the secrets are all there.

Have fun.

Fig.2

12/8/15

To find the wave of the molecular structure find the frequency manipulating between each atom and combine all and divide by 10. And stay with that. And then apply again the same number to the next structure. Then look at the difference and what it dose. It is all about manipulating the energy. If you know how to manipulate the energy to each particle then is absolute that you can manipulate the entire structure as a whole.

Status:

Have your thoughts of the statics that are happening between the molecules. What is that? It is electrical charge and Hz in between. Study that!!!

So protons are negative (-) but not always. Why? Because when they interact in certain combination they change the charges to (+) and this is what is the most fundamental in Nano technology.

How can you establish that?

Well you can recharge them (stabilize them) by giving similar quantum structure that makes the Nano particles – measure the electrical wave charge between all the particles. When you see electro charge of electricity between certain part look into the wave form and measure the Hz. See what this Hz does and what are the changes with that. How in the entire structure the secret is in between the static and the wave Hz sound. If you also measure the sound in between the particle that has the static electrical Hz and recorded, you can later apply it automatically and will do by the Nano very quick change. Systems will combine this way easily without to much calculations.

That is why is so important to do all your calculations in math through the light sound. Mathematical sound waves structure math. Because when you are working in the quantum Nano Particle world every structure of Nano particle is by itself an entire Universe. And you can measure that by Fractal Sound Wave Math.

Fig.3

Nano Technology si Fractal. Unit by Unit.

12/20/15

The Resistance of Energy in the Nano-particles

The particles are collaborating with a single molecular structure. Each individual structure of 1 particle is its own Universe. Multiply that to the Infinite number. So in this matter think of each particle as a Nano multi second with the constant of (-10) and a quarter notion of motion. And there is the light formation. So each pixel is also a nano-particle and own universe. Creation starts literally from the resistance of each individual nano-particle world that has its own gravity and magnetic law. So they combine like the electrons (combine by the power of 10). If you do the calculations do not forget to apply the math as fractal light. Not matter.

So basically if you create 1 nano-particle can measure the pressure and the energy and the mass and do it in Fractal Light Math.

Then add the second 1 nano-particle universe. Each of them has its own central sun / black hole. Do not forget that each is also a portal. So combine them together- if the collusion has bright light of blue, then they can collide and match as a multiplication to create new 3rd system from both of the $1+1=3$

But if two nano systems are collided and the color is bright orange yellow or red then the two systems of the nano world do not belong together energetically and will create a resistance in the structure it self. It will also open a hole in the quantum structure it self.

Do not try to manipulate it and change it. The only way you can do that is when the system itself consciously chooses the making of itself.

Why is that? Because is pure life consciousness in the making itself it knows where to go. Give the motion to single unit of nano-particle and let it choose itself its own making with the second.

That will create the new $1+1=3$ system.

Then let that 3 to create and choose by itself the next 1 nano universe particle again $1+1=3$ and so on. If the color is blue stay with it. This way is smooth and without resistance. Creation in the making. Now give it specific notion of command (nano- particle) - let it sit for a day to choose its own light. Again let it choose its own making. This way is pure consciousness by giving to choose to create from the purity and the essence of God particle that you are pure love for the creator. This way will show you the correct system of nano world with out resistance and it will always work for the benefit of love creation.

Let it choose itself.

Cromuel Pleiadian

12/27/15

NANO 1 PARTICLE

1 Particle of Photons is the most necessary part of the building blocks of 1 system. To do that you must reconnect the energetic field with magnetic and gravitation at the particular location of energetic field. Bring that measurement to the smallest particle divide by the power of 10. So if you measure the energy at the area you are: and for example the Hz is 3.3089 divide this by 10 and by 10 until you reach the smallest possible division. And that smallest result is what you need to work with when you work with the Nano technology. Stem sells are big. Divide them by 10 divide by 10 divide by 10 ... till you reach again .00.... ext and that is how is the easiest way to manipulate human DNA RNA structure molecular energetic force. Force because is energy. We are all energy. So this is how is done. Do not forget to protect by shield each particle, because must be stabilized this way and it will not change position till you give the new Hz command.

Cromuel and Council of 9

This is by all means the most important field synergetic that is building and giving the positioning of all the nano- particles. Must each nano structure be calculated with the position and be synchronized with the next one that is on position. Remember Nano-particles work and are like the Universe it self. If you move 1 nano particle will have tremendous effect on the entire structure. New structure parallel structure.

10

Build it by frames and connect it like a film.

Well... If you ask a question of... - Can I skip time space?

Ha Ha Ha... Yes. That is when you learn more.

Nano Council of 9

1/7/16

Photons and Protons are not the same as charge depending of the interaction of the fields. But what you will discover that actually they are the same particle but is depending in which force of field they are interacting and with how much force. Photon is changing the (-) frequency and becomes (+) Proton and vice verse. This is the secret. So now you know. The change you can find when you manipulate the frequency Hz sound and it will be shown in the binary code if you do it in reverse with the Quantum computer Algorithm.

All of the energetic force is modulating and merging with each other and is changing is own structure like a new structure (more mutating) depending on the force of the energy position and reality. Because each parallel reality of vibration has its own laws of magnetic and gravitational force that all the Universe is constructed from.

1/12/16

FINITE BUILDING BLOCKS

Single particle of Finite is the smallest energetic coordination that is the opposite of the Infinity. The importance for the knowledge is significant. Systems of single rebuilding blocks are step by step systems of the infinite particles to the smallest energetic field. That is when the entire Universal structure is concentrated in one single particle. The pressure is in the Infinite magnetic field. It is so much that is the entire energy of the Universe in ONE Finite particle. So what that means is that there is literally no difference between the Infinite and the Finite. It is becoming Infinite to expansion and Finite when is collapsing. It is the TORUS.

Ha Ha!!! Do you see how is all ONE now?! Consciousness particle expands and contract. And the collapse is when the expansion and the contraction are becoming '0' point. The manifestation is at the '0' point. All the vortexes are in between the 2 structures. So that is also what is creating the portals. When you work with the Nano Finite- that is when you go from within to reconstruct block by block the parallel reality in single structure. And when the Nano Finite expands that structure becomes the Infinite.

And that is what is developing the parallel reality because the '0' point vertex that is created from the Finite and Infinite is the one that is creating the parallel structure of each momentum vortex parallel Universe. Creation in the Making.

And what is pushing this structure to breath expand Infinite and contract Finite? It is the Vortex of all the existing structures of the light magnetic and gravitational force in the field of energy (universal energy).

So when you know that you will be able to recreate and mimic a Nano structure as the Infinite structure. So do not think if is one Nano Universe is only that. NO.

If you create one block of Nano Universe know that that function is also the same as the Infinite. Be aware of your emotions when you work with the Nano Finite, because it goes and mimics your energetic field. More- is penetrating and can literally change your structure of the entire immune system. Because when this Nano expands becomes Infinite. So you can insert (or place) 1 Nano-particle (constructed the way you wish) and that is all you need to multiply in the system. It is important this Nano-particle to charge and protect with magnetic shield Hz of the human body or material so you can control the expansion more in the orbit of the system that you desire. Be ready for big change with that. Do apply all the protective shield with always 0.32789 Hz and do not increase. Stay with that Hz and let the Nano-particle to readjust and except the Hz because it is a life consciousness. Do Not play with it wait to except it. If not you must try to decrease the Hz to less and less till the Nano-particle excepts the Hz. That is very fundamental so you will be able to control the eco-system of that 1 Nano-particle.

13

So now you know how all that works and interacts to the Universe.
Good luck on Your exploration.

2/13/16

Hyper Space

The acceleration of the structure of the space embedded into the Nano 1 Particle Torus Structure mimicking the South and North pole of the structure. Bringing to one molecule and giving motion on space to open a portal into hyper space acceleration. This way you move through space time Intergalactic. '0' point Portal Vacuum Torus Star Structure Nano Cite Unit One. Apply Sacred Geometry.

Nano-particle hyper space systems are absolutely coded with Ether Technology that is made from 1 Nano Unit 2 by 2.
Remember $1+1=3$. This Is how you can make the Technology.
Stay within the system energy, mimic the geometric structure to every single Nano Unit Particle and let the geometry be as the entire system. Stop. Then repeat by doubling the structure depending of the size. If you wish you can have entire fleet or planet move through it. But that is way advance. Just hint here!!! Solaris system.

There is a portal that when the time is correct the chosen ones will learn about it.

DNA RNA CODON DRRH

"Marina Jacobi- Council of 9 2/212016 DNA RNA CODON DRRH

Dear family we wish to show you the path for the new 5D structure of the human genetic blood structure. The manipulation is very important and the new systems of application to the serums of the DNA Codon. Prepare for input and integration from this message that will activate a new DNA RNA Codon.

Please expect the integration in your conscious structure. The activation is now. DNA DRRH Codon. The signals of the Blood are all connected with the DNA and the RNA genetic Coding. To activate the Blood cell and completely replace the old blood cell you can activate the signal structure by frequency HZ with the genetic code of DRRH. This is multiple signals of positive (+) and negative (-) charges. Look for the ones that are repeating to 3 times vertical and diagonal. Horizontal is a mistake in the calculation if you take it only by itself. Do you know that you can look at the Genetic Code as a Sacred Geometry? The one of the pentagonal star with 6 pointed star is the one that is now resonating in the 5D structure.

The new structure. In each point of that should be the code of DRRH and it will repeat 2 times. When you see the repetition 2 times of the geometric structure of each point next to each other then you know that is in 5D position.

But how do you achieve that? You achieve that by finding the Gino and you can replace it manually but you can also do that by signals of frequency Hz that will reposition the gino. That is very easy because each signal is clear and it will match the next one and the next one. Systems are always 2 by 2.

Repetition of zero point fractal momentum. The fractal momentum is the breathing moment of the popping in and out of the new structure.

The new signal is like a completely new structure.

What signal? The selective one. Every pentagonal six star secret geometry has a sound that is vibrating on. So find that resonance sound and apply that signal Hz of the pentagonal six pointed star to the DRRH GINO. And you will see miracles. That is how the body will also heal too. Not only that but the blood will become RH (-) negative witch is more perceptive for the new 5D geometric mantra signals. Hyper space timeline. The new beginning of the human race will have this type of blood line. Is more clear and is resonating on 5D and up Dimensional structures. This is how we help a lot of humans. Understand that you must continue with all your hearts and rebuild the new human structure so we are all here to assist you.

Just be humble, good and loving. Give with out expectations. look for the manifestation with out resistance. Then all will come to place through synchronize signal. We are the Council of 9. The recollection of you humans is very important. You must do everything from now on through unity. Do not stop. We are here with you. The only thing you need to do is Love. That will give you the proper frequency to see us. We are one. Contribute, contribute, contribute to yourself and others with out expectations. Do not look for the results. Just give and give and give. That is the secret. When you apply this moment to moment into your daly expressions you will match the now momentum with us. And that is the beginning of your fits contact with us. Be true to yourself and do not try to profit from others because you lowering your own vibrational frequency that is connected with your own ego structure. The Ego structure is lowering your vibrational signal. Look everything as a frequency signal. I that simple. The true love, giving and abundance will come through any form, not only money. Let creation manifest for you with all its beauty not though conditions of old believe systems.

16

Core in the making. Signal 1 is going to be given now. Soon as you listen to this message. There is a code here. Remember every word has sound geometry and that now will and is penetrating in your system of DNA code. Se we are giving you now the signal code through this message. Emerge and integrate now!!! WE are the Council of 9. Love to all.

I hope that all scientific community will take a note of this material. If you wish to contact me or download the Harmonic reactor material of Advance E.T. technologies please go to www.marinajacobi.com and you can email me at harmonic reactor@yahoo.com Love you all."
