BLUEPRINT MINI MAGRAVS WIRELESS

IMPORTANT!

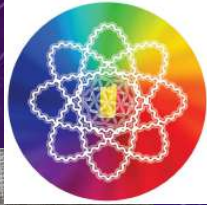

This document and its details are provided free of charge and are protected by international patent and invention legislation, thus the replication of the Mini MaGravS wireless unit is prohibited for economic or commercial purposes.

All the results are recorded in the education-research-development-innovation project of the Mini MaGravS wireless unit. They will be made available to the public at the end of each month in the testimonial presentation meeting organized by the Scientific Association Plasma România.

CONSTRUCTION MATERIALS:

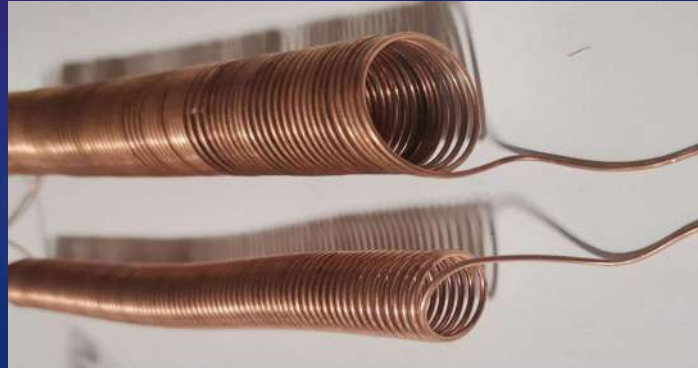

- GA.N.S.'es of CO₂, ZnO, CuO, CH₃ and Amino acids;
- Rods with a diameter of 10.7 mm and 17.1 mm, maxim length 30 cm;
- 11 meters of copper wire of 1 mm without enamel;
- Bandage roll;
- Gas cylinder;
- 8 syringes of 5 ml;
- Neodymium magnet cylinder of 6 cm x 1,2 cm;
- Insulation tape;
- 1.5 meter plug and extension cord with 3 outlets;
- Round casserole of 300 g;

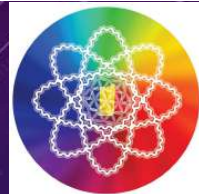

METHODS OF MAKING THE COILS

- 88 turns are wound on a 17.1 mm rod in the Magnetic direction. 88 turns are wound on a 10.7 mm rod in the Gravitational direction.
- Each coil will have one end of a maximum of 15 cm, and the other end of a maximum of 3 cm.

GA.N.S. CAPACITOR MAKING METHOD

Cut the dressing with a maximum width of 7 cm and a length as appropriate to be inserted into the copper coil formed by the central wire. Drops of GA.N.S.'esand Amino acids will be placed at the beginning of the textile in this order:

1. CO₂ GA.N.S.: We have 5 drops and 1 drop of Amino acid right above.
2. ZnO GA.N.S.: we have 2 drops and 2 drops Amino acid immediately above.
3. CUO GA.N.S.: we have 1 drop and 2 Amino acid right above.
4. CH₃ GA.N.S.: We have 3 drops and 1 drop of Amino acid immediately above.

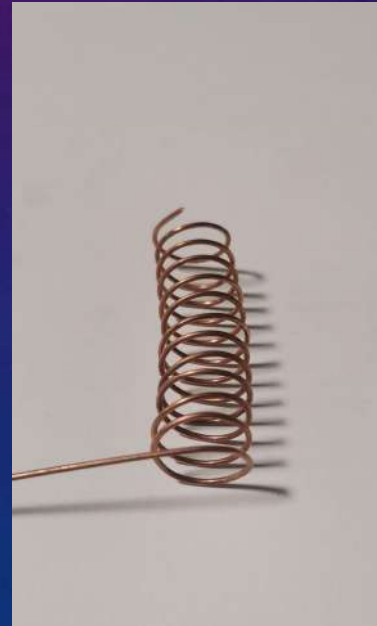

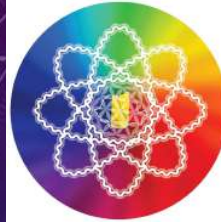

THE METHOD OF MAKING THE CAPACITOR MAGNET

Cut 130 cm of wire that is wound in the Magnetic direction, directly on the magnet.

The other end of the central wire is coiled in the Gravitational direction after making the connections to the coils.

THE METHOD OF MAKING THE CONNECTIONS

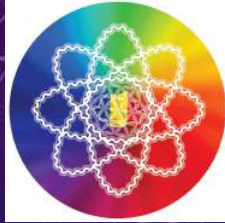

Insert the Gravitational coil into the Magnetic coil so that you have 15 cm and 3 cm wires at the ends. Insert the central wire into the Gravitational coil.

The short ends of the two Magnetic and Gravitational coils are twisted in the Magnetic direction.

The central wire is then twisted in the Magnetic sense, then the free ends forming capacitors that wind in the Magnetic and Gravitational sense.

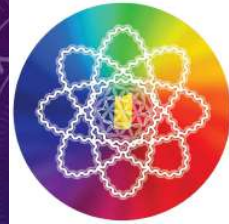

THE METHOD OF NANO-COATING THE WHIT FIRE

We use rapid fire nano coating on the wireless Mini MaGravS unit that has all the connections made so that multi-colored layers appear all over its surface.

THE ASSEMBLY METHOD

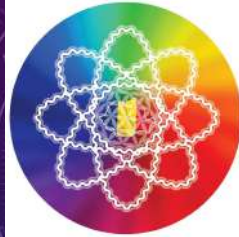

Use insulating for tape the two connections made and the wires coming out for the connections with the plug.

Insert the magnet into the Magnetic capacitor and the textile with GA.N.S. In the Gravitational capacitor.

Put 3 drops of CO₂ GA.N.S. Plasma water over the Magnetic coil of the wireless Mini MaGravS.

ACTIVATION METHOD

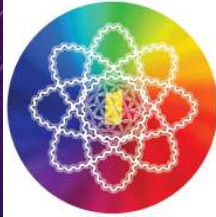

The plug from the extension cord is inserted into one of the outputs on the edge, and the plug from the wireless Mini MaGravS unit into another output, so that we have the output in the middle free.

Place the Mini MaGravS wireless unit in the vertical position.

THE TRANSMUTATION

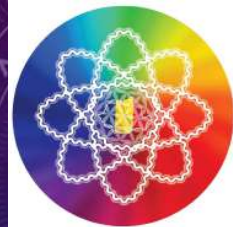

Each user who makes this Mini MaGravS wireless plasma source has the responsibility to activate the plasma fields in the home/car by offering Love and Gratitude to the Divine.

The plasma source will begin to envelop the location/car with divine light to begin the process of nano-coating the copper wires and plasmatisize the spaces.

MANY THANKS WITH GRATITUDE

- To the Creator who gave us the possibility of awareness of new realities.
- To Keshe Foundation Spaceship Institute for providing humanity with nano space technology Keshe G.A.N.S.
- To all the knowledge seekers who energetically supported the manifestation of the Antenna MagravS Generator Independent wireless project and the Mini MaGravS wireless project.
- To all entities who have supported us on a multidimensional level to manifest these projects of the Divine plan.
